Scanning and Mobility Reference Guide

Solutions that Enable Productivity

Honeywell

pocket sized

The pocket-sized Dolphin® 6100 joins the starting lineup of Honeywell's in-premise mobile computing solutions.

Honeywell's new Dolphin 6100 mobile computer is a stylish and reliable device engineered for retail and light industrial environments. This lightweight mobile computer is ergonomically designed to provide hours of comfortable use. Powered by Adaptus® Imaging Technology, the Dolphin 6100 delivers advanced data capture capabilities including linear and 2D bar code scanning, digital image capture, and intelligent signature capture, minimizing the need for additional devices. Integrated 802.11b/g technology enables real-time wireless communication, providing mobile workers with access to the information that they need to make critical decisions while on the go. *Choose Honeywell's pocket-sized Dolphin 6100 to provide your workers with the tools needed to streamline tasks and improve productivity, while protecting your investment.*

Honeywell

Honeywell Scanning & Mobility is a leading manufacturer of high-performance image- and laser-based data collection hardware, including rugged mobile computers and bar code scanners. Our product portfolio is one of the broadest in the AIDC industry, providing you with solutions for vertical markets such as retail; healthcare; and transportation and logistics. We complement our innovative products with advanced software, service and professional solutions that enable customers to effectively manage data and assets. Honeywell products are sold worldwide through a network of distributor and reseller partners. For more information, please visit www.honeywellaidc.com.

Hand-Held Scanners

Warranty
3 yrs

Eclipse™ 5145

- Laser based-alternative with longer working range and wider scan field than typical CCD scanners
- CodeGate® data transmission is ideal for menu-scanning applications
- CodeSense® technology allows for PowerSave mode and automatic wake-up

1D | SMS

Warranty
9520/40: 5 yrs
9535: 2 yrs

Voyager 9520
VoyagerBT 9535
VoyagerCG 9540

Voyager® 9500 Series

- Automatic trigger allows scanner to function as a hand-held or fixed presentation device
- CodeGate data transmission is ideal for menu-scanning applications
- Full scanner line offers models that decode all 1D bar codes including high density codes (9521/41 only) for application specific needs

1D | EAS SMS

Warranty
5 yrs

VoyagerGS® 9590

- Ergonomic design allows scanner to fit comfortably into a wide range of hand sizes
- Increased scan speed provides an aggressive solution for scanning all standard 1D codes
- Automatic in-stand detection aids in seamless presentation mode scanning
- Optional integration of RF EAS antenna increases efficiency by simultaneously deactivating RF EAS tags and decoding bar codes

1D | EAS IP31 RATED SMS

Warranty
2 yrs

IS4225

- Wearable scanner fits comfortably on back of hand, preventing operational fatigue
- Automatic scanning facilitates speedy operation by eliminating the need for repeated button presses
- Mounts to virtually any device, taking up minimal space

1D |

Warranty
3 yrs

Fusion® 3780

- Primary omnidirectional scan pattern increases throughput by scanning codes in any orientation
- Secondary single-line scan pattern facilitates targeted menu scanning
- Automatic in-stand detection facilitates seamless presentation mode scanning
- Optional integration of RF EAS antenna increases efficiency by simultaneously deactivating RF EAS tags and decoding bar codes

Honeywell

Honeywell Software

EasyDL™	Omniplanar™ SwiftDecoder™	Omniplanar™ SwiftDimension™
• Parses bar code data found on government-issued identification cards for applications involving age verification or automatic electronic form population • Eliminates the need for host system software to process the encoded information contained within 1D and 2D bar codes found on government-issued identification • Compatible with Vuquest 4980, Genesis 7580, Focus 1690, FocusBT 1633 and IS4920.	• Provides hand-held scanners with snappy performance and fixed scanners with industry-leading decode times • Increases read rates of damaged and poorly printed real-world bar codes • True 360° omnidirectionality increases ease-of-use and first-pass reads	• Enables existing fixed-position automatic identification imaging systems to capture accurate two-dimensional measurements of objects within 0.5", eliminating the need for costly or bulky dimensioning equipment • Maximizes uptime and reduces maintenance by eliminating additional hardware components

Omniplanar™ SwiftJPEG™	Omniplanar™ SwiftOCR™	Omniplanar™ SwiftVerify™
• Achieves significantly higher compression ratios than standard JPEG compressors • Preserves critical image detail for review purposes • Increases image storage capacity by 20–30 times	• Provides existing AIDC imaging devices with high-speed optical character recognition (OCR) of OCR-A, OCR-B and MICR characters, without needing additional OCR dedicated hardware • Templated-OCR software designed specifically for AIDC hardware reduces costs associated with full-page-OCR software	• Allows existing AIDC hardware to quickly and accurate verify 1D and postal bar codes based on ISO/IEC, ANSI and MERLIN specifications • Authenticates verification results with a single pass over a bar code instead of traditional multi-swipe methods • Increases workplace efficiencies by allowing operators to both scan and verify with a single piece of AIDC hardware

Third-Party Software

SOTI MobiControl	PowerNet Twin Client	ITScript Net
• Enables centralized remote management of Dolphin mobile computers and image kiosk solutions • Tracks hardware and software assets • Performs scheduled or ad-hoc file/data synchronization • Compatible with Dolphin® mobile computers	• Connects Dolphin® WLAN mobile computers directly to host applications via TN3270, TN5250 or TNVT terminal emulation and industry-standard TCP/IP protocol • Enables customized functionality for wireless data collection including keyboard mapping, automated login capabilities and pass-through printing • Simplifies integration of Dolphin® WLAN mobile computers into a variety of mainframe and open system application environments • Compatible with Dolphin® 7600, Dolphin® 7850, Dolphin® 7900, Dolphin® 9500 Series, Dolphin 9900 Series, and Image Kiosk 8560	• Allows programmers and non-programmers to quickly and easily write effective data collection applications • Saves development time by testing data collection applications before deployment • Compatible with Dolphin® 7600, Dolphin® 7850, Dolphin® 7900, Dolphin® 9500 Series, and Dolphin 9900 Series

Services and Professional Solutions

Service Made Simple*

Honeywell's comprehensive service program provides customers with easy, hassle-free repair service for their hand-held, hands-free and bioptic scanners, as well as mobile computers.

Service Made Simple™ is an affordable solution to help ensure front-line devices are always operating at top performance.

- Full Comprehensive Coverage—devices are covered for normal wear & tear or accidental breakage

- Quick-Turnaround Promise—Hand-held, hands-free and bioptic products will be serviced in one business day, mobility products will be serviced in three business days, and all will be returned to your site via expedited delivery

- Value-Add Maintenance—engineering changes, such as firmware upgrades, will be implemented on your devices during the repair process at no extra cost

Enterprise-Level Custom Service Programs and Factory Warranty Extension Service Plans

Factory Warranty Extensions

For customers who are only interested in factory warranty extensions, Honeywell has a solution. You can extended your products' factory warranty in yearly increments up to a total of five years. Best of all, this can be purchased at any time, and renewed annually. For devices under warranty extension, Honeywell guarantees a 10 day turnaround time.

Enterprise-Level Custom Service Programs

Honeywell offers custom service programs for high-volume customers that require an increased level of support. Features include:

- Asset Tracking
- Application Loading
- Custom Reporting
- Spares Management
- Battery Management
- Custom Packaging/Labeling
- Coverage Levels
- Turnaround Time

Professional Services

Our team of Honeywell professionals and business partners can assist you with in-depth solution planning and project execution, ranging from site analysis and consulting to software application development and system installations—all helping to ensure that your project goals and long-term needs are met.

Software Services
Our software consultants and business solution partners work as an extension of your development team to understand your specific software application requirements and help you build an application that best suits your business needs.

Equipment Configuration and Staging
Device staging and configuration can be an extremely inefficient process to manage internally. We have the ability to save you time and money, improving your overall ROI—by providing devices completely configured for a full "out of the box" solution.

Custom Hardware Configuration
Specifically designed for enterprise-class customers with unique requirements, we offer the option to customize your hardware solutions in a variety of ways to optimize usability in specific applications.
